Washington, D.C. 20036

Dear Jerome:

Through our Swiss affiliate, I have obtained information concerning another potential expert in nicotine, cotinine/metabolism. The man in question is Professor A. H. Beckett of the Chelsea Polytechnic Institute in London. He is a pharmacologist and has several publications on the subject in question. At the present time, I am having the Library obtain a list of these publications.

He was recommended by Dr. Francis J. C. Roe, an old friend of ours, who has consulted for Imperial Tobacco and the Tobacco Advisory Council in the United Kingdom. I have every confidence in Dr. Roe's recommendation and would expect that Professor Beckett is truly an expert.

When the Library search has been completed, I will send you a copy of the information.

Very truly yours,

RBS/sagr
